

MTCS ORDER FORM –04	5920 Nall, Suite 303
	Mission, Kansas 66202

SPCC Workbook was developed to provide the information to the responsible official to understand their responsibilities and provide training for the organization. We have developed this workbook after completing SPCC Plans for many power generating and rural electric cooperatives.

We recommend each facility have the workbook to conduct annual training of employees required by EPA. (40 CFR 112.7) Training is one of the top ten citations when EPA visits companies.

The workbook is over 60 pages of information, illustrations, employee involvement questions as well as employee test. This workbook will provide training for the manager of the SPCC Plan, as well as, all employees that might respond to a spill.

The book table of contents is show on the back of this form.

Send this form to MTCS, If you have any questions, please call 913-432-4022.
